

DEMONSTRATION PROJECT

Catalog Ateliere

Turn software options into a clear quote request

A marketing website with a configurator for two solutions: workshop management and fleet management. Visitors choose a product, select modules and prepare a quote request tailored to their business.

The combined workshop and fleet configurator with a sample selection. The interface is shown in its original language.

KEY FEATURES

- Three configuration paths: workshop, fleet or both products.
- Core and optional modules, grouped with straightforward explanations.
- A running summary, with shared modules selected only once.
- Preview, enquiry form and a recap of the chosen configuration.

WHO IT IS FOR

Software providers serving car workshops and vehicle fleets.

WHY IT IS USEFUL

Helps prospective customers explain what they need before the sales conversation begins.

DEMO SCOPE

Presentation and configuration demo. Modules describe the software offering; this website does not execute them. Pricing is quoted individually, and enquiry delivery requires email configuration.

A SIMPLE WORKFLOW

Choose a product / select modules / review the summary / request a quote.
