

DEMONSTRATION PROJECT

Asistent Virtual / NexTurn

A virtual reception desk for salon conversations

A virtual reception demo supported by a salon administration portal. The simulator illustrates replies based on approved information, clarification of requests and handover to a person when the conversation calls for it.

The public NexTurn simulator; the conversation and available slots are fictional. The interface is shown in its original language.

KEY FEATURES

- Interactive scenarios covering services, prices, unclear enquiries and booking requests.
- Configuration of salon services, staff, opening hours and policies.
- Role-based access and separation of information between salons.
- Privacy scenarios and configuration checks before publication.

WHO IT IS FOR

Beauty salons looking to organise replies to common customer questions.

WHY IT IS USEFUL

Shows how a salon can organise consistent replies using information it controls, with human involvement when needed.

DEMO SCOPE

Demo and controlled pilot. The simulator sends no messages and books no real slots. Calendar, bookings and payments are not implemented; live channels need additional activation steps.

A SIMPLE WORKFLOW

Question / approved information / clarification or handover to a person.
